Ultra Gold Windows

Strong and efficient, Prism® Ultra Gold windows offer the design features you need, with the options to create the look you want. Bold and attractive, as well as resilient, their true strength comes from their streamlined design and features.

Double Hung windows with Colonial grids add a classic appeal to this home.

Benefits

- A Quality Construction** The fusion-welded frame and sash profiles are heated and fused to create a continuous, one-piece design that resists water and air infiltration.
- B Fresh Air** Vent latches allow window to be partially open for ventilation. *(Double Hung only)*
- C Ease of Use** Flush-mount tilt latches release the sash to tilt in for trouble-free cleaning. *(Double Hung only)*
- D Sleek and Secure** Color-matched cam lock secures the window and provides a streamlined interior.
- E Reliable Weather Barrier** Patented meeting rail overlaps and interlocks both sash to form an impressive weather barrier.
- F Easy Operation** The stainless steel constant force 3/4" coil spring balance system supports sash in any open position and allows for continual smooth operation. *(Double Hung only)*
- G Built-in Efficiency** Standard ProSolar™ soft coat Low E glass with an Argon gas fill increases thermal efficiency by keeping the warm air in during the winter and the cool air in during the summer.
- H Ergonomically Designed** The contoured, extruded lift rail is molded into the sash for strength and easy use.
- I Weather Barrier** Stepped sill quickly moves water away from the window and helps combat wind driven rain.
- J Smooth Operation** Unique disc-shaped pivot system provides perfect alignment between the sash and main frame to ensure trouble-free raising and lowering. *(Double Hung only)*

Small dead-air chambers in the vinyl profile increase insulation.

The covered exterior complements any style of home, including wood, stucco, vinyl and brick.

Supercept The stainless steel, U-shaped design of the optional Supercept™ spacer system delivers thermal performance, structural integrity and durability to help maximize the performance of your window.

Glass	Energy Performance ¹ Prism ¹ Ultra Gold		
	U-value	R-value	SHGC
Standard ProSolar™ Soft Coat Low E Glass and an Argon gas fill	.32	3.13	.27

¹Numbers reflect simulated testing in winter conditions: 0° outside temperature, 70° inside temperature, on a Double Hung window, 3/4" I.G. unit without grids and Intercept® spacer system.

Can be ordered to meet
\$1500
